

I am a highly skilled and passionate developer. I am confident in my ability to create dynamic, responsive, and user-friendly SaaS/ AI applications.

In my previous roles, I have gained extensive experience in UI/UX and Frontend development, including working on visually appealing and user-friendly interfaces using the Angular Framework. I am Proficient in developing single-page applications and micro-frontends, with experience in the full project lifecycle from ideation to launch, including architecture.

My expertise in HTML, CSS, JavaScript, and Typescript has enabled me to deliver highly efficient and effective solutions that meet client needs and exceed expectations. Additionally, I am capable of designing UIs that are both aesthetically pleasing and user-friendly.

I am well-versed in Git, Azure, and Agile methodologies, which have allowed me to work effectively with cross-functional teams and ensure the timely delivery of projects while maintaining high-quality standards. My strong coding standards and critical thinking skills make me a valuable team member. I possess strong interpersonal and communication skills and can readily interact with co-workers and clients. With excellent time management skills and a strong attention to detail, I can complete projects quickly and efficiently. Furthermore, I am always eager to learn new technologies and stay up-to-date with the latest industry trends.

Beyond my front-end coding skills, I am also passionate about writing and sharing my knowledge with my teammates. I value the opportunity to help others improve their craft because I have gained so much from others sharing their skills and knowledge.
